Tasks

Task: 9----- **Story Points: 4**----- **Dependencies: Tasks 1 – 8**

Create unit test cases to test the process of a TEQ user logging in and creating an account. Check edge cases such as creating a duplicate username, only able to login if a user's status is active, etc.

Task: 10 ----- **Story Points: 4**----- **Dependencies: None**

Create the GUI for the TEQ user to upload a template. The user should provide a "nickname" for the file, a path to the file, and there is a button to submit and a button to cancel. The user should also be able to browse for the path.

Task: 11 ----- **Story Points: 4**----- **Dependencies: None**

Given a file path to a template and a nickname for that template, store the file and the nickname in a new table in the database.

Task: 12 ----- **Story Points: 4**----- **Dependencies: Task 11**

Create the GUI for a user to be able to download a template. Display only the files' nicknames and the user selects which one they want to download. There should be a button to confirm that they want to download the template and a cancel button.

Task: 13 ----- **Story Points: 4**----- **Dependencies: Task 11**

Once the user has selected a template to download, retrieve the file from the database and download the file into the user's computer.
